

Did your last opportunity just pass by?

JOIN OUR TEAM IN AN INTERNSHIP IN TRAFFIC/TRANSPORT ENGINEERING

We work on the development of smart cities and sustainable infrastructure for developing countries, achieved by combining traffic engineering, transport planning, and renewable energies. Based on European expertise and technology for Sustainable Development, we offer products and services in Latin America.

We want to offer you the opportunity to test your capabilities and apply your knowledge in real-life situations. This internship will take place at our office located in the Science Park in Jönköping, Sweden. Be part of the sustainable development of the new emerging economies, gaining International experience.

QUALIFICATIONS: OPERATING FIELDS:

- Bachelor Studies in Engineering/Architecture
- Talent for planning and passion for technology
- Self motivated and good project management skills
- Good written and verbal English. Spanish is a plus.
- Understanding of Sustainable Development is a plus
- Traffic and transport impact assessment
- Strategic route planning and Transport Strategies
- Public transport infrastructure and service advice
- Integrated land use and feasibility studies
- Transport, bicycle and pedestrian advice
- Creation of new Sustainable Development ideas
